Continuation Sheet (PTOL-303) 10/045,937

Continuation of 10. Other: The Office regrets a typographical error in the final rejection where claims 1-27 were rejected when claims 1-7 and 9-28 should have been referenced. Additionally, the 3/15/04 copy of the claims contains claim 15 and also a statement that claim 15 has been canceled. The Office has examined the claim 15. Applicants are requested to clarify the status of claim 15. Applicants state Beebe et al. teach detection of changes in optical properties which is not contemplated by the instant invention. These remarks are not commensurate in scope with the instant claims that do not exclude optical measurements. Applicants further state the analysis taught by Beebe et al. is dependent upon the size of the hydrogel and cannot be read on the instant invention which is independent of size. In light of the 35 USC 112 second paragraph issues, it is not clear what size relationships are claimed and the claims have been properly read on Beebe et al. Finally, Applicants state Beebe et al. does not immobilize the dye as contemplated by the instant invention. The Office maintains "immobilization" is a sufficiently broad term to be read on the immobilized indicator of Beebe et al.
